UBIQ Aerospace

UBIQ Aerospace is a deep tech company devoted to building solutions to critical problems for unmanned and autonomous aircraft, enabling operations that matter. The company was founded in 2017 as the commercial platform for the D•ICE technologies, combined, an autonomous icing protection solution for the UAV and UAM industries. D•ICE provides value through flight time, enabling operations currently impossible, and thereby allowing for new and robust UAV applications.

The technologies of UBIQ Aerospace comes from world-leading and renowned research scientists within robotics, autonomous systems, and UAV technologies. The first D•ICE product was delivered in January 2020 with more to follow soon.
